## Empty bucket Info

-  • Emptying the bucket deletes all objects in the bucket and cannot be undone.
- Objects added to the bucket while the empty bucket action is in progress might be deleted.
  - To prevent new objects from being added to this bucket while the empty bucket action is in progress, you might need to update your bucket policy to stop objects from being added to the bucket.
- [Learn more](#) 

 If your bucket contains a large number of objects, creating a lifecycle rule to delete all objects in the bucket might be a more efficient way of emptying your bucket. [Learn more](#) 

[Go to lifecycle rule configuration](#)

### Permanently delete all objects in bucket "karjl"?

To confirm deletion, type *permanently delete* in the text input field.

Cancel

Empty

 **Successfully emptied bucket "karjl"**  
[View details below](#) If you want to delete this bucket, use the [delete bucket configuration](#).
